Cloud and Application Development student with hands-on experience in front-end development using HTML, CSS, JavaScript, React, and Bootstrap. Proven ability to build responsive, user-focused web applications with measurable performance improvements. Familiar with AWS services and actively exploring UI/UX design principles to enhance usability.

Projects

Beyond Pixels – Responsive Website

Sep 2025 - Dec 2025

- Designed and developed a responsive website with 6+ sections and 100% mobile compatibility.
- Integrated PHP and MySQL to manage dynamic content across multiple pages.
- Improved user engagement with animations and interactive navigation, reducing bounce rate by ~20%.

Advanced Task Management Dashboard

Jul 2025 - Present

- Built using React 18, Bootstrap 5, and Framer Motion with full CRUD functionality and localStorage persistence.
- Implemented drag-and-drop task reordering, dark/light theme with persistence, advanced filtering, and responsive glassmorphism UI.
- Focused on clean UX, accessibility, and real-world state management practices.

E-Commerce Prototype

Mar 2025

- This e-commerce static website is a high-performance frontend application featuring a catalog of 50+ individual items across 5 distinct categories.
- By utilizing React's virtual DOM and optimized Bootstrap components, the site achieves sub-second load times, specifically a Lighthouse performance score of 95+.
- The codebase consists of over 20 reusable functional components, ensuring a modular architecture that is easily scalable.

Portfolio Website

Jan 2026

- Developed a high-performance React portfolio using Vite, achieving 30% faster load times and 100% mobile responsiveness.
- The site integrates 3+ core UX features—including scroll-spy, persistent theme toggling, and micro-animations—while maintaining a fluid 60 FPS experience across 15+ device breakpoints using React Hooks and modular CSS.
